

GRAIN AND PRODUCE MARKET

Light Receipts and High Cables Inducements for Traders to Buy.

CORN BUYERS FEELING BETTER

At Present Prices Country Holders Are Not Inclined to Sell and Better Prices Are Anticipated.

OMAHA, November 15, 1911.

There has been a very firm tone to the wheat market at the close for two days and higher cables this morning, combined with very light receipts at all primary points, have the trade a reason for taking the buying side of the market, advancing values. The soy cash demand, heavy stocks and the exceptional heavy visible supply are the factors that are causing the present otherwise strong situation.

There was also a much better feeling on the buying side of the market and the large stocks of corn and the season's receipts are reported for December as being looked for.

At present prices the country holders are not inclined to sell and better prices are being looked for.

Very strong cables and light receipts started bulls and weak shorts to buying and prices were steadily advanced. Cash prices were higher.

Corn is firm, and the general sentiment rules bullish. Unless the movement of new corn increases rapidly, prices should work higher.

Primary wheat receipts were 753,000 bushels and shipments were 44,000 bushels against receipts last year of 588,000 bushels and shipments of 4,000 bushels.

NEW YORK STOCK MARKET

Position Weakened Considerably by Extensive Realizing.

SHORT SELLING INCREASES

Recent Advance Chiefly Affair of Professional Traders Who Are Left Without Buyers at Higher Prices.

NEW YORK, Nov. 15.—That the position in the stock market had been weakened considerably by the extensive realizing of the last few days was indicated by the movements of prices today.

The tone was heavy and the market exhibited a lack of staying power, which discouraged the trade. The period of declining prices which followed the recent advance has not been extended beyond a normal reaction, and with no evidence of a permanent support for the market from either the large banking interests, traders became more today. Realizing was continued and short selling was done on a larger scale.

A view of the market which considers support is that stocks are being closed out in anticipation of the assembling of congress next month. A tariff bill is expected to be introduced to do with the government corporations are feared.

The recent advance, according to the common explanation, was predicted on the court's acceptance of the American Tobacco reorganization plan, but the action of independent stock investors today in selling opposing the plan in the market has been the chief factor in the decline of the stock market.

The advance may be said to have been chiefly an affair of professional traders, who have been unable to sell the stocks which they have marked up.

The collapse of the speculative movement in the market, which has been going on actively for several days, added to the decline of the market. The decline in the market was due to the fact that the directors of the American Tobacco Company had announced their intention to distribute the stock of the company to the stockholders.

Standard Oil shares had no response to the declaration of the last quarterly dividend on the 15th. The market was quiet for some time, but a recovery was seen in the afternoon.

Large banks were active in the open market for short bills in 3 1/2 per cent. for three months bills in 3 1/2 per cent.

All Mohammedans Involved in Crisis Arising in Persia

WASHINGTON, Nov. 15.—The crisis in Persia invades the peace of all countries in which Mohammedans have found a refuge.

The ultimatum from Russia to Persia that apology must be made for the seizure of the property of the deposed shah's brother is the culmination, apparently, of developments that have been pending since America's financial experts were selected by the new national assembly to attempt the regeneration of the finances and commerce of the country.

It is claimed here that the grant to Mr. Shuster, treasurer general, of complete executive power did much to irritate Russia. The vigorous assertion by Mr. Shuster and the Persia assembly of the complete independence of the country and its freedom from any obligation to Russia or Great Britain has been a source of irritation to the former and of criticism from leading sources in Great Britain.

There now is a disposition among leading figures in Mohammedanism to construe as a concerted assault on the Mohammedan people the continued attack upon Persia and the situations in Tripoli, Morocco and parts of India. How far this unrest of the Mohammedans will develop in Persia remains more or less uncertain.

COFFEE QUOTATIONS DECLINE SHARPLY IN GOTHAM MARKET

NEW YORK, Nov. 15.—The easier tendency recently noted in the coffee market was accentuated by a sharp decline in quotations for spot supplies in the local market today.

Stocks of coffee have been accumulating rather rapidly at Brazilian ports, more than 2,000,000 bags now being reported at Santos, and during the last day or two offers received here from Brazilian shippers are said to have shown increased willingness to sell.

Local millers today quoted the grade known as Rio 7 as low as 14 cents, in some instances as low as 14 cents, comparing with the recent high price of 15 cents per pound.
